

MSLQ-CL (Adapted and validated to be used in clinical clerkship context)

General Description

The 75-item (total of 15 sub-scales) modified MSLQ consists of two major sections: Motivation and Learning strategies. Motivation section contains 31 items (six sub-scales) that assess students' goals and value beliefs for a course, their beliefs about their skill to succeed in a course, and their anxiety about tests in a course (Pintrich & De Groot, 1990). The Learning strategies section contains 44 items (nine sub-scales) that includes items regarding students' use of different cognitive and metacognitive strategies and student management of different resources (Pintrich & De Groot, 1990). The items are rated on a 7-point Likert scale from 1 being "not at all true of me" to 7 being "very true of me". Items marked as "reversed" are reverse coded items for which the ratings have to be reversed before a Scale scores are constructed by taking the mean of the items that make up that scale or sub-scale.

MOTIVATION

(i) Intrinsic Goal Orientation

- (1) In a clinical posting, I prefer study material that really challenges me so I can learn new things.
- (16) In a class like this, I prefer content that arouses my curiosity, even if it is difficult to learn.
- (22) The most satisfying thing for me in this clinical posting is trying to understand the content as thoroughly as possible.
- (24) When I have the opportunity in this clinical posting, I choose tasks that I can learn from even if they don't guarantee a good grade.

(ii) Extrinsic Goal Orientation

- (7) Getting a good grade in this clinical posting is the most satisfying thing for me right now.
- (11) The most important thing for me right now is improve performance, so my main concern in this clinical posting is to ensure I pass this posting.
- (13) If I can, I want to get better grades in this clinical posting than most of the other students.
- (30) I want to do well in this clinical posting because it is important to show my ability to my family, friends, employer, or others.

(iii) Task Value

- (4) I think I will be able to use what I learn in this clinical posting in other clinical posting.
- (10) It is important for me to learn the study material in this clinical posting.
- (17) I am very interested in the content area of this clinical posting.
- (23) I think the content in this clinical posting is useful for me to learn.
- (26) I like the subject matter of this clinical posting.
- (27) Understanding the subject matter of this clinical posting is very important to me.

(iv) Control of Learning Beliefs

- (2) If I study in appropriate ways, then I will be able to learn the content in this clinical posting.
- (9) It is my own fault if I don't learn the study material in this clinical posting.
- (18) If I try hard enough, then I will understand the content in this clinical posting.
- (25) If I don't understand the clinical posting content, it is because I didn't try hard enough.

(v) Self-Efficacy

- (5) I believe I will receive an excellent grade for this clinical posting.
- (6) I'm certain I can understand the most difficult material presented in the readings for this clinical posting.
- (12) I am confident I can learn the basic concepts taught in this clinical posting.
- (15) I'm confident that I can understand the most complex material presented by the tutor in this clinical posting.
- (20) I'm confident I can do an excellent job on the assessments in this clinical posting.
- (21) I expect to do well in this clinical posting.
- (29) I am certain I can master the skills being taught in this clinical posting.
- (31) Considering the difficulty of this clinical posting, the tutors, and my skills, I think I will do well.

(vi) Test Anxiety

- (3) When I take an assessment in this clinical posting, I think about how poorly I am doing compared to other students.
- (8) When I take an assessment in this clinical posting, I think about other parts of the assessment I can't answer or perform.
- (14) When I take an assessment in this clinical posting, I think of the consequences of failing.
- (19) I have an uneasy, upset feeling when I take an assessment in this clinical posting.
- (28) I feel my heart beating fast when I take an assessment in this clinical posting.

LEARNING STRATEGIES

(i) Rehearsal

(38) When I study for this clinical posting, I practice saying the material to myself over and over.

(44) When studying for this clinical posting, I read my notes and the study material over and over again.

(55) I memorize key words to remind me of important concepts in this clinical posting.

(68) I make lists of important items for this clinical posting and memorize the lists.

(ii) Elaboration

(50) When I study for this clinical posting, I pull together information from different sources, such as lectures, study materials and discussion.

(58) I try to relate ideas in this clinical posting to those in other clinical posting whenever possible.

(60) When reading for this clinical posting , I try to relate the content to what I already know.

(63) When I study for this clinical posting , I write brief summaries of the main ideas from the study materials and my notes.

(65) I try to understand the material in this clinical posting by making connections between the study material and the concepts from the lectures.

(75) I try to apply ideas from study materials in other class activities such as lecture and discussion in this clinical posting.

(iii) Organisation

(32) When I study the material for this clinical posting, I outline the material to help me organize my thoughts.

(40) When I study for this clinical posting, I go through the readings and my notes and try to find the most important ideas.

(47) I make simple charts, diagrams, or tables to help me organize study material in this clinical posting.
